Release Notes for Counterpath Multimedia Communicator Bria™ 2.3 for Windows

April 7, 2008

New Features for Bria 2.3

- Performance has been improved.
- Improved ability to work with screen capture programs/automated test tools.
- Fixed all issues relating to slicing on the GUI.
- Support for AZERTY keyboard.
- Ability to turn on target domain routing in advanced tab
- Added IM to conference participant options.

Known Issues

- Currently, Bria does not select the best codec based on the available bandwidth and network conditions. When making an offer, it will offer all enabled codecs. When accepting an offer, it will accept the first supported codec from the offered list.

Fixed Problems

The Severity field describes the impact of a problem:

- B: Blocks development and/or testing work
- C: Critical problem that crashes, or results in loss of data or severe memory leak
- M: Major, resulting in major loss of function.
- N: Normal.
- E: Enhancement
