Release Notes for eyeBeam for Mac 1.5.18.3

August 29, 2009

Major Changes

This release of eyeBeam for Mac introduces support for the Snow Leopard™ operating system software.

Known Limitations

- XTunnels is not yet supported with eyeBeam for Mac®.
- Upgrading of contacts is currently not supported during software upgrade. The workaround is to export the contacts to a file, perform the upgrade, then import the file.
- TLS not working on the Leopard® operating system.

If you are using the Leopard® operating system, make sure that you have installed the latest patch of Leopard.

Fixed Problems

The Severity field describes the impact of a problem:

- C: Critical problem that crashes, or results in loss of data or severe memory leak
- M: Major, resulting in major loss of function.
- N: Normal.
- E: Enhancement

Severity	ID	Description
C	9434	eyeBeam quit unexpectedly when exit with keeping IM window and "Ban this person" prompt open and after exit click "Yes" on "Ban ..." prompt.
